Environmental awareness

About

- Local production in Frankfurt.
- Self-sufficient energy generation through own solar system.

Materials

- Preferred use of natural and renewable building materials such as wood.
- Natural surface treatment with e.g. beeswax and linseed oil for a non-toxic environment.

Saving resources

- High quality production and assembly as a prerequisite for long-lasting products.
- Possibility of repairing instead of building from scratch.
- Furniture can be modified in size and shape as required.
- Focus on reusability in packaging and transportation material.
- Reduction of material needs and waste through computer-aided manufacturing.
- Client visits are done by bike if possible.

Natural surface
treatment with
linseed oil

Solar system
Spacewood
21 KWh
